

FRADIPTA ALQAIYUM

Software Engineer (Mobile)

Jakarta, Indonesia | +62 812-6878-6843 | fradipta.alqaiyum@gmail.com

linkedin.com/in/dipoo | github.com/fradip12 | www.fradipta.my.id

Professional Summary

Mobile software engineer with 6+ years of experience building and shipping production apps with Flutter and native iOS (Swift). Experienced in offline-first design, Clean Architecture, CI/CD automation and migrating native apps to Flutter. Currently the sole mobile engineer for a hotel management system app that serves 200+ hotel units across Southeast Asia, and an enthusiast building LLM-powered features. Also a technical instructor in AI and mobile development at Hacktiv8, a coding school with 66,000+ students across Indonesia.

Technical Skills

- **Mobile:** Flutter (BLoC, Clean Architecture, SQLite & Drift), iOS Swift (SwiftUI, UIKit, MVVM-C)
- **Languages:** Dart, Swift, Python; OOP and SOLID principles
- **Backend & Cloud:** REST, GraphQL, WebSocket, gRPC, MQTT; Supabase, Google Cloud Platform, Firebase; Node.js (basic)
- **Databases:** PostgreSQL, MySQL, SQLite; Firestore (NoSQL)
- **AI & LLM:** RAG pipelines and LLM orchestration with LangChain; OpenAI SDK; Claude Code, GitHub Copilot, MCP; CNN models (Google Colab, Kaggle)
- **CI/CD:** Fastlane, GitHub Actions; releases to App Store, Google Play, Firebase App Distribution, Microsoft App Center
- **Tools & Monitoring:** Git (GitHub, GitLab, Bitbucket), branching strategies, Xcode, Android Studio, Gradle, Flutter DevTools; Sentry, Firebase Crashlytics, Firebase Analytics
- **Process:** Agile (Scrum, Kanban), Jira, cross-functional collaboration

Professional Experience

Archipelago International, Jakarta, Indonesia

Jul 2025 – Present

Mobile Engineer

Full-time

- Own the full lifecycle of the group's Flutter guest app as the sole mobile engineer: architecture, development, CI/CD, releases and production support.
- Build mobile apps for the group's loyalty system, employee management system, property management system and in-room tablet assistant.
- Deliver core guest journeys: online check-in, booking management, stay history and Bluetooth door-lock access from the phone.

Tribel, Singapore

Jul 2025 – Dec 2025

Mobile Engineer

Freelance (Remote)

- Built an AI-powered travel itinerary platform for an early-stage startup, working with a global, cross-functional team.
- Developed full-stack features on Supabase and orchestrated LLM calls with the OpenAI SDK to generate personalised itineraries.

KOLTIVA, Jakarta, Indonesia

May 2023 – Jul 2025

Mobile Engineer

Full-time

- Built mobile apps across multiple squads for KoltiTrace, a supply-chain traceability platform for field data collection and mapping used in 65 countries.
- Designed offline-first apps on SQLite with reliable background sync to the server, so field agents can work in areas with no connection.
- Set up CI/CD pipelines for build and deployment, and introduced a Git branching strategy adopted by 15 contributors.

- Led the migration of the B2C *KoltiTrace FarmCloud* app from native code to a single Flutter codebase.
- Bridged existing native iOS (Swift) features into Flutter through platform channels.
- Built the B2B *KoltiTrace FarmGate* and *FarmExtension* apps in Flutter with Clean Architecture.

Hacktiv8, Indonesia

Jan 2024 – Dec 2025

Mobile Development Instructor

Freelance

- Trained and mentored students in mobile development, from fundamentals to hands-on project delivery.
- Designed structured learning modules and shared industry best practices through guided projects.
- Ran a 6-month mobile development programme for new engineers at BitHealth Indonesia (2024).
- Delivered a 1-week mobile app development course for employees of Bank Kaltimara (BPD Kaltimara).
- Taught in the IBM AI programme for students: Phase 1 (2025) and Phase 2 (2026).

Assetdata.io, Malaysia

Jan 2022 – May 2023

Mobile Developer

Full-time

- Developed and maintained asset-management and data-insight apps in Flutter for clients including PETRONAS and AirAsia.
- Designed scalable app architecture and integrated backend APIs for a consistent experience across platforms.
- Worked with cross-functional teams in an Agile process to ship new features and improve app efficiency.

Minasa Fintech, Indonesia

Jan 2020 – Dec 2021

Mobile Developer

Internship

- Built all features of the *DDS Digital* startup app end to end with Flutter, Firebase and REST APIs.
- Used GetX for state management and Git workflows for team collaboration.

Berbagi Solusi Tech, Indonesia

Jul 2019 – Sep 2019

Associate Developer

Internship

- Built mobile app UI, integrated APIs and fixed bugs under the guidance of senior engineers.
- Developed Node.js web APIs to serve the mobile app.
- Worked with the product manager on product development and learned Agile practices.

Education

Sepuluh Nopember Institute of Technology, Surabaya, Indonesia

2017 – 2021

Bachelor of Engineering in Computer Engineering

GPA 3.31 / 4.00

- Faculty of Intelligent Electrical and Informatics Technology.
- Thesis: *Automated Deep Vein Thrombosis (DVT) Segmentation with a Convolutional Neural Network based on the U-Net Architecture.*

Certifications & Languages

Japanese-Language Proficiency Test (JLPT) N4, The Japan Foundation – score 101/180 2024

Fundamentals of Deep Learning, NVIDIA Deep Learning Institute 2019

Languages: Indonesian (Native), English (Professional working proficiency), Japanese (Elementary, JLPT N4)
