

FRADIPTA ALQAIYUM

Software Engineer (Mobile)

Jakarta, Indonesia | +62 812-6878-6843 | fradipta.alqaiyum@gmail.com | linkedin.com/in/dipoo
github.com/fradip12 | www.fradipta.my.id

Summary

Mobile engineer with 6+ years shipping production apps in Flutter and Swift. Strong in offline-first design, Clean Architecture, CI/CD and native-to-Flutter migration. Currently sole mobile engineer for a hotel management system app serving 200+ hotel units across Southeast Asia, and an enthusiast building LLM-powered features. Also an AI and mobile development instructor at Hacktiv8 (66,000+ students across Indonesia).

Skills

- **Mobile:** Flutter (BLoC, Clean Architecture, SQLite & Drift), iOS Swift (SwiftUI, UIKit, MVVM-C)
- **Languages:** Dart, Swift, Python
- **Backend & Data:** REST, GraphQL, WebSocket, gRPC, MQTT, Supabase, GCP, Firebase, PostgreSQL, MySQL, SQLite, Firestore
- **AI & LLM:** RAG, LangChain, OpenAI SDK, Claude Code, GitHub Copilot, MCP
- **DevOps:** Fastlane, GitHub Actions, App Store, Google Play, Firebase App Distribution, Sentry, Crashlytics, Git

Experience

Archipelago International, Jakarta | *Mobile Engineer* **Jul 2025 – Present**

- Sole mobile engineer owning the Flutter guest app end to end: architecture, CI/CD, releases and production support.
- Build apps for the group's loyalty system, employee management system, property management system and in-room tablet assistant.
- Deliver guest check-in, booking management, stay history and Bluetooth door-lock access.

Tribel, Singapore | *Mobile Engineer (Freelance)* **Jul 2025 – Dec 2025**

- Built an AI travel itinerary platform with Supabase, the OpenAI SDK, working with a global team.

KOLTIVA, Jakarta | *Mobile Engineer* **May 2023 – Jul 2025**

- Built offline-first KoltiTrace apps on SQLite with background sync, used for supply-chain traceability in 65 countries.
- Led the migration of *FarmCloud* from native code to Flutter, bridging existing Swift modules via platform channels.
- Built the B2B *FarmGate* and *FarmExtension* apps in Flutter with Clean Architecture.
- Set up CI/CD pipelines and a Git branching strategy adopted by 15 contributors.

Assetdata.io, Malaysia | *Mobile Developer* **Jan 2022 – May 2023**

- Built and maintained asset-management and data-insight apps in Flutter for clients including PETRONAS and AirAsia.

Minasa Fintech, Indonesia | *Mobile Developer (Internship)* **Jan 2020 – Dec 2021**

- Built all features of the *DDS Digital* app with Flutter, Firebase and GetX.

Hacktiv8, Indonesia | *Mobile Development Instructor (Freelance)* **Jan 2024 – Dec 2025**

- Trained students and corporate teams (BitHealth, Bank Kaltimtara) in mobile development; taught in the IBM AI student programme.

Education & Certifications

B.Eng. Computer Engineering, Sepuluh Nopember Institute of Technology – GPA 3.31/4.00 **2017 – 2021**

Thesis: *Automated DVT Segmentation with a CNN based on the U-Net Architecture*

JLPT N4, The Japan Foundation (101/180) **2024**

Fundamentals of Deep Learning, NVIDIA Deep Learning Institute **2019**

Languages: Indonesian (Native), English (Professional working), Japanese (JLPT N4)
